CONTENTS

Preface vii

Cholesterol and mevalonic acid modulation in cell metabolism and multiplication
M.R. Soma, A. Corsini and R. Paoletti (Italy) 1

Assessment of accumulated body burden of metals
S. Skerfving and U. Nilsson (Sweden) 17

Molecular biology approaches to biological monitoring of genotoxic substances
E. Nieboer, F.E. Rossetto and J.D. Turnbull (Canada) 25

Monitoring of early nephrotoxic effects of industrial chemicals
R. Lauwerys, A. Bernard, A. Cardenas (Belgium) 33

Individual susceptibility to toxicity
P. Grandjean (Denmark) 43

Evaluation of adverse effects in the standard-setting process
D. Henschler (Germany) 53

The Toxic Oil Syndrome (TOS, 1981): from the disease towards a toxicological understanding of its chemical aetiology and mechanism
W.N. Aldridge (UK) 59

Qualitative and quantitative experimental models to aid in risk assessment for immunotoxicology
M.I. Luster, D.G. Pait, C. Portier, G.J. Rosenthal, D.R. Germolec, C.E. Comment, A.E. Munson, K. White and P. Pollock (USA) 71

The mechanisms and evaluation of chemically induced allergy
I. Kimber and R.J. Dearman (UK) 79

Athymic experimental animals in pharmaco-immunological research
P. Juul†, H.B. Christensen, H.P. Hougen, O. Svendsen, P. Thygesen and J. Rygaard (Denmark) 85

Cellular and humoral mechanisms of immunotoxicological tissue manifestations induced by immunotoxic drugs
K. Udaka (Japan) 93

The popliteal lymph node assay: a tool for studying the mechanisms of drug-induced autoimmune disorders
J. Descotes (France) 101

Molecular basis for differences in susceptibility to toxicants: introduction
A.R. Boobis (UK) 109

Genetically determined differences in drug metabolism as a risk factor in drug toxicity
M. Eichelbaum, H.K. Kroemer, and G. Mikus (Germany) 115

Acetyltransferases and susceptibility to chemicals
D.W. Hein, T.D. Rustan, M.A. Doll, K.D. Bucher, R.J. Ferguson, Y. Feng, E.J. Furman and K. Gray (USA) 123

The molecular mechanism of peroxisome proliferator action: a model for species differences and mechanistic risk assessment
S. Green, J.D. Tugwood and I. Issemann (UK) 131

Inherited defects in DNA repair and susceptibility to DNA-damaging agents
J. Hansson (Sweden) 141

Are newer scientific concepts in regulatory toxicology used timely and appropriately?
C. Hodel (France) and R. Bass (Germany) 149

New approaches to the assessment of eye and skin irritation
G. Calvin (Belgium) 157
Classification of chemicals as sensitisers based on new test methods
P.A. Botham (UK) 165
Classification of chemicals for carcinogenic and mutagenic properties
P.G.N. Kramers and H. Roelfzema (The Netherlands) 173
The European Community classification of chemicals for reproductive toxicity
F.M. Sullivan (UK) 183
Public health problems of organic solvents
M. Ikeda (Japan) 191
Methodology in neurotoxicology — activities within the World Health Organization and International Programme on Chemical Safety
G.C. Becking (USA) 203
Principles of identifying and characterizing neurotoxicity
R.C. MacPhail (USA) 209
International validation of a neurobehavioral screening battery: the IPCS/WHO collaborative study
V.C. Moser and R.C. MacPhail (USA) 217
Integration of behavioral and neurophysiological approaches in neurotoxicology
E. Frantík and M. Horváth (Czechoslovakia) 225
Developmental aspects of neurobehavioural toxicity
G. Bignami, G. Laviola, E. Alleva, R. Cagiano, C. Lacomba and V. Cuomo (Italy) 231
Extrapolation from animals to humans: scientific and regulatory aspects
G. Winneke and H. Lilienthal (Germany) 239
The evolution of toxic effluents in fires and the assessment of toxic hazard
D.A. Purser (UK) 247
The development of a new small-scale smoke toxicity test method and its comparison with real-scale fire tests
B.C. Levin (USA) 257
Modeling of toxicological effects of fire effluents: prediction of toxicity and evaluation of animal model
J. Pauluhn (Germany) 265
Pre-hospital strategy for therapeutic intervention of fire victims
F.J. Baud, F. Richter, H. Julien and C. Bismuth (France) 273
Hospital treatment of victims exposed to combustion products
P. Kulling (Sweden) 283
Progress and challenges in the preclinical assessment of cytokines
T.J. Hayes and J.A. Cavagnaro (USA) 291
Preclinical evaluation of recombinant human interleukin-4
J.B. Cornacoff, K.A. Gossett, T.A. Barbolt and J.H. Dean (USA) 299
Pathology induced by Interleukin-6
B. Ryffel, M. Kammüller (Switzerland), R. Robison and L. Myers (USA) 311
Utilization of homologous proteins to evaluate the safety of recombinant human proteins — case study: recombinant human interferon-gamma (rhIFN-γ)
J.D. Green and T.G. Terrell (USA) 321
Experience with the preclinical assessment of basic fibroblast growth factor (bFGF)
G. Mazué, F. Bertolero, L. Garofano, M. Brughera and P. Carminati (Italy) 329
Current guidelines for the preclinical safety assessment of therapeutic proteins
R. Bass, U. Kleeberg, H. Schröder and E. Scheibner (Germany) 339
Difficulties in conceiving and applying guidelines for the safety evaluation of biotechnologically-produced drugs: some examples
J.-R. Claude (France) 349

Ca^{2+}-dependent mechanisms of cytotoxicity and programmed cell death
S. Orrenius, M.J. McCabe Jr. and P. Nicotera (Sweden) 357
Structural and functional aspects of the thyroid follicular epithelium
L.E. Ericson and M. Nilsson (Sweden) 365
Cell proliferation and thyroid neoplasia
E.D. Williams (UK) 375
Pathophysiology of chemical injury of the thyroid gland
C.C. Capen (USA) 381
Chemical carcinogenesis in the thyroid gland
Y. Hiasa, Y. Kitahori, N. Konishi and M. Ohshima (Japan) 389
Thyroid gland neoplasia: non-genotoxic mechanisms
R.M. McClain (USA) 397
Naturally-occurring excitatory amino acids as neurotoxins and leads in drug design
P. Krogsgaard-Larsen and J.J. Hansen (Denmark) 409
Role of GABA in the genesis of chemoconvulsant seizures
K. Gale (USA) 417
Sodium and GABA-activated channels as the targets of pyrethroids and cyclodienes
T. Narahashi, J.M. Frey, K.S. Ginsburg and M.L. Roy (USA) 429
Second messengers in cholinergic-induced convulsions and neuronal injury
K.M. Savolainen and M.-R. Hirvonen (Finland) 437
Glutamate transmission is involved in the mechanisms of neuronal degeneration produced by intrahippocampal tetanus toxin in rats
G. Bagetta and G. Nisticò (Italy) 447
Field studies of aflatoxin exposure, metabolism and induction of genetic alterations in relation to HBV infection and hepatocellular carcinoma in The Gambia and Thailand
C.P. Wild (France), S.M. Shrestha (Nepal), W.A. Anwar (Egypt) and R. Montesano (France) 455
The use of biomarkers in epidemiology: the example of bladder cancer
P. Vineis (Italy) 463
Advantages and limitations of laboratory methods for measurement of carcinogen-DNA adducts for epidemiological studies
R.K. Kaderlik, D.-X. Lin, N.P. Lang and F.F. Kadlubar (USA) 469
Expression of pulmonary cytochrome P4501A1 and carcinogen DNA adduct formation in high risk subjects for tobacco-related lung cancer
H. Bartsch, M. Castegnaro, M. Rojas, A.-M. Camus, K. Alexandrov and M. Lang (France) 477
Use of biomarkers in epidemiology: quantitative aspects
L. Ehrenberg and M. Törnqvist (Sweden) 485
Use of white rot fungi in the degradation of environmental chemicals
M.M. Shah, D.P. Barr, N. Chung and S.D. Aust (USA) 493
Hazard assessment of chemical contaminants in soil
C.L.M. Poels and W. Veerkamp (The Netherlands) 503
Hazard assessment in freshwater ecosystems
N.O. Crossland (USA) 511
Advances in prediction of exposure for organic chemicals
D. Calamari (Italy) 519
Biochemical responses as indicators of toxic effects of chemicals in ecosystems
C.H. Walker (UK) 527
Environmental hazard classification of chemicals
A. Lundgren (Sweden) 535
Role of reactive oxygen species in cell toxicity
H. Sies and H. de Groot (Germany) 547

Mechanisms of cytotoxicity caused by antitumour drugs
J.A. Hickman, H.M. Beere, A.C. Wood, C.M. Waters, and R. Parmar (UK) 553
Thiol modification and cell signalling in chemical toxicity
P. Nicotera, J.M. Dypbukt, A.D. Rossi (Sweden), L. Manzo (Italy) and S. Orrenius (Sweden) 563
Programmed cell death and its protective role with particular reference to apoptosis
R. Schulte-Hermann, W. Bursch, B. Kraupp-Grasl, F. Oberhammer and A. Wagner (Austria) 569
Paracetamol toxicity and its prevention by cytoprotection with iloprost
D.S. Davies, D.J. Fawthrop, P. Nasseri-Sina, J.W. Wilson, S.J. Hardwick and A.R. Boobis (UK) 575
Protection from oxidative damage in mouse liver cells
A.W. Harman, G.M. Adamson and S.G. Shaw (Australia) 581
The clinical toxicology of Chlordecone as an example of toxicological risk assessment for man
P.S. Guzelian (USA) 589
Interaction and distinction of genotoxic and non-genotoxic events in carcinogenesis
H. Yamasaki, M. Mesnil and H. Nakazawa (France) 597
Prediction of non-genotoxic carcinogenesis
J. Ashby (UK) 605
Pathological markers for non-genotoxic agent-associated carcinogenesis
N. Ito, R. Hasegawa, K. Imaida, T. Masui, S. Takahashi and T. Shirai (Japan) 613
Non-genotoxic factors in the carcinogenetic process: problems of detection and hazard evaluation
S. Parodi, D. Malacarne and M. Taningher (Italy) 621
Risk assessment of non-genotoxic carcinogens
S.H. Moolgavkar and E.G. Luebeck (USA) 631
Chemicals classified by IARC: an investigation of some of their toxicological characteristics
D.B. McGregor (France) 637
Molecular and cellular basis for adequate metabolic design of genotoxicity studies
F. Oesch, B. Oesch-Bartlomowicz, H.J. Arens, T. Friedberg, D. Utesch, H.R. Glatt and K.L. Platt (Germany) 643
Problems and opportunities in toxicity testing arising from species differences in xenobiotic metabolism
J. Caldwell (UK) 651
Sex-specific cytochrome P450 as a cause of sex- and species-related differences in drug toxicity
R. Kato and Y. Yamazoe (Japan) 661
Dose-dependent metabolism and dose setting in chronic studies
J.S. Bus and R.H. Reitz (USA) 669
Metabolic studies as a basis for the interpretation of metal toxicity
L. Manzo (Italy), L.G. Costa (USA), M. Tonini, C. Minoia and E. Sabbioni (Italy) 677
Characterization of the effects of aluminum on luciferase biosensors for the detection of ecotoxicity
J. Guzzo, A. Guzzo and M.S. DuBow (Canada) 687
Cell injury and death caused by bacterial protein toxins
G. Donelli and C. Fiorentini (Italy) 695
Induction of apoptosis in cultured hepatocytes and in the regressing liver by transforming growth factor-β1 occurs without activation of an endonuclease
F. Oberhammer, G. Fritsch, M. Pavelka, G. Froschl, R. Tiefenbacher (Austria), T. Purchio (USA) and R. Schulte-Hermann (Austria) 701

Toxicity in animals and safety in humans: the predictive value of animal studies
G. Rosati, A. Morisetti and P. Tirone (Italy) 705
Epidemiology of adverse reactions to intravascular iodinated contrast media
G. Ansell (UK) 717
The profile evolution of acute severe poisoning in Spain
S. Nogué, L. Marruecos, J. Nolla, J. Monteís, A. Ferrer and E. Civeira (Spain) 725
Rapidly developing cocaine-induced peripheral portal liver damage
S.J. Charles and C.J. Powell (UK) 729
Mechanism of pain induced by radiocontrast media
A.P. Corrado, G. Ballejo, E. Antunes and G. de Nucci (Brazil) 739
A dual effect of some 5-HT3 receptor antagonists on cisplatin-induced emesis in the pigeon
P. Navarra, M. Martire, R. del Carmine, G. Pozzoli and P. Preziosi (Italy) 745
Production of lipid hydroperoxides and depletion of reduced glutathione in liver mitochondria after acute ethanol administration to rats
T. Trenti, E. Sternieri, D. Ceccarelli, D. Gallesi and A. Masini (Italy) 751
Plasma glutathione level in paracetamol daily abuser patients. Changes in plasma cysteine and thiol groups after reduced glutathione administration
T. Trenti, M. Bertolotti, C.N. Castellana, A. Ferrari, L.A. Pini and E. Sternieri (Italy) 757
Properties of bolesatine, a translational inhibitor from *Boletus satanas* Lenz. Amino-terminal sequence determination and inhibition of rat mitochondrial protein synthesis
O. Kretz, J. Reinbolt, E.-E. Creppy and G. Dirheimer (France) 763
Molecular basis for differences in susceptibility to coal workers' pneumoconiosis
P.J.A. Borm, R. Schins, Y.M.W. Janssen and L. Lenaerts (The Netherlands) 767
Behavioral toxicity of guanidinosuccinic acid in adult and young mice
R. D'Hooge, Y.-Q. Pei, B. Marescau and P.P. De Deyn (Belgium) 773
Three-generation reproductive studies of a synthetic pyrethroid — cyhalothrin
P.B. Deshmukh (India) 779
Safety/risk assessment of pesticides: principles, procedures and examples
F.C. Lu and M.L. Dourson (USA) 783
